

DRUG PREVENTION ON THE MOVE!

Operation UNITE's "On The Move!" drug education and prevention initiative is provided **FREE** to 7th and 10th grade students. The five-component program meets standards of the **Kentucky Core Content** areas of Practical Living and Health.

Interactive Mobile Classroom

This one-of-a-kind classroom educates students about drugs and their effects. A written survey is given prior to the program arriving on campus. Students are then surveyed throughout the PowerPoint via a Qwizdom® system that provides immediate response data on their perceptions. This data is provided to host schools to determine specific needs of their student population.

"This particular program may be one of the best I have ever seen as far as getting students involved, thinking, and providing important educational information in a format and manner that the students responded to positively."

Russell Halsey
Principal, Johnson Co. Middle School

"The immediate feedback following the interactive activity and simulation was extremely beneficial in 'bringing home the point' about the dangers of substance abuse and driving under the influence."

Jennifer Mattingly
Principal, Rockcastle Co. High School

"UNITE's mobile classroom is a unique way to teach our children real-life instances of drug mistreatment, and we hope that it will go toward preventing future abuse and misuses."

Jane Beshear
Kentucky First Lady

Simulated Impaired Driving Experience (SIDNE)

Utilizes a battery-powered go-kart, operated by a UNITE staff member, to simulate the effects of distraction and impairment from alcohol and other drugs on a motorist's driving skill. Students receive a debriefing on their experience.

Fatal Vision Tri-cycle Course

Students wear impaired-driving goggles while attempting to navigate a tri-cycle through a defined course.

Fatal Reactions (Distract-a-Match®)

A shape and color matching game to demonstrate the impact of distractions on reaction time and judgment.

Fatal Reflections

A computer program uses webcam images of students to simulate consequences in a variety of DUI scenarios.

Provided in partnership with Appalachia HIDTA. This project is also supported by the Health Resources and Services Administration (HRSA) of the U.S. Department of Health and Human Services (HHS) under grant number D04RH24757, Rural Health Care Services Outreach Grant Program, in the amount of \$150,000 with 0% financed by nongovernmental sources.
