

Operation UNITE has developed an educational program, "The Truth About Vaping," tailored for both youth (middle and high school students) and the community (parents/guardians, caregivers, and educators).

This program is designed to give parents, caregivers, teachers, and others who mentor children the facts about these products. In addition, the presentation discusses some of the unknown dangers, and speaks to the potential dangers from using electronic cigarettes.

## Fact or Fiction?

This program will provide:

- An understanding of what a vape/e-cigarette is.
- An understanding how these devices work, the process of creating vapor, and what chemicals are being inhaled.
- An understanding of language and terms used regarding vapes/e-cigarettes.
- Strategies on how to say "no thanks" when offered the device.
- An understanding of resources and individuals a person can speak with regarding issues within their circle of friends, schools, and communities.
